

# Flight plan filing guidelines to Samedan (LSZS)

## General Notes:

The flight plan must contain one of the following points: DETRI, GERSA, PELAD, PIXOS, RONAG, SOPER, SOSON, UTAVO (except for piston aircraft and helicopter)

The availability of routings to LSZS is dependent on the military activity in the temporary reserved areas (TRA) above the eastern part of Switzerland. This is handled by CDR1 routes and FUA (Flexible use of airspace) restrictions. The CDR1 routes and/or the airspace are closed when the respective TRA is active.

Following TRAs are concerned:

- LS-T 51 CALANDA
- LS-T 52 BEVERIN
- LS-T 53 TARASP
- LS-T 61 CORVATSCH

In addition, the activity of LS-R11/R11A S-Chanf has an influence on the availability of ATS routes.

The status of the CDR1 routes and the FUA restrictions can be found in the European AUP/UUP on the NOP Portal.

## 1. FPL filing when TRAs and LS-R11/R11A are not active:

- It is possible to file both IFR- or Y-FPLs.
- Waypoints PELAD or RONAG are mandatory (except for piston aircraft and helicopter).

**FPL route examples for IFR FPLs to LSZS***From West:*
